Differentiated Instruction:

Elementary, Junior, and Advanced – designed to match the expertise of your students as they grow from novices to independent scholars. At each level, we’ve built in appropriate advice for identifying, evaluating and citing sources. Choose the version that’s right for your classroom, individual student, or subset of learners (ELL/ESL, gifted, AP, LD, etc.).

School districts subscribed to NoodleTools benefit by sharing a common framework for teaching and learning the research process across multiple grades and transitions between elementary, middle and high school curricula. All NoodleTools teaching modules incorporate common core concepts.

Online tools for the research process:

- Citation
- Source evaluation
- Note-taking
- Outlining
- Document annotation/archiving
- Online collaboration
- Peer review

Integrated tools to support authentic research and original writing, paired with online teaching units and offline expert assistance. High-quality, best-practices support for your classroom: designed by educators, for educators. Our process feels natural and intuitive, scaffolding the way you already teach. NoodleTools works with all current browsers and is fully iPad-accessible. And no online advertising, ever.
### How does NoodleTools work?

**Teacher environment and support:** A teacher or group of teachers can set up an online classroom that mirrors the actual classroom experience. Assign work, monitor students’ progress in real-time, manage the paper trail, and provide feedback. Use the instructor comment bank to assist in providing students with relevant guidance. Generate charts that illustrate the distribution of source types in a student’s bibliography. Assign NoodleTools teaching modules to reinforce comprehension.

**Note-taking & outlining:** On the Notecard Tabletop, students create, tag, pile and link notecards in ways specifically designed to make connections, develop original ideas and articulate arguments. Drag notecards into piles to suggest subtopics, then into your outline to organize your ideas in preparation for writing. Take advantage of the ability to annotate and archive online sources for future reference.

**Source evaluation & bibliography generation:** Generate accurate citations in MLA, APA, and Chicago formats, including legal styles based on The Bluebook. Help pop-ups and dynamic citation templates assist students at the points-of-need. “Show Me” online teaching modules guide students through the process of identifying source types and recognizing relevant, credible information. Functions for import of book data from WorldCat and citations from databases are configurable by an administrator.

**Group collaboration:** Any number of students can work on a project simultaneously from different locations and view each other’s changes in real-time. Notecards and citations are clearly labeled with the name of the student who authored them.

**Google Drive integration:** Our integration with Google Drive (including support for Google Apps for Education accounts) gives you the option to receive and review student papers online. Students can also choose to export their source list, notecards and outline to Word.

**Share in the love:**

**NoodleTools Supporters**

“Anyone who has used NoodleTools, students and teachers alike, are ardent supporters due to the simplicity and accuracy of the options. Thank you for your attention to making the research paper citations precise and for providing a resource to develop notecards and outlines.”

G. Gnesin, Library Media Specialist

“...after several years, our students now see NoodleTools as a "way of life!"”

C. Nudi, High School Library Media Specialist

“NoodleTools is the most reasonable and most useful library subscription that contributes to student success. It is a powerful teaching tool for recording, organizing, and citing research. The design is so user friendly!”

A. Mikos, Middle School Library Media Specialist
