NoodleTools works with all current browsers, is iPad-accessible, and includes a free Companion App for building source lists “on the go.”

No online advertising, ever.
How does NoodleTools work?

Instructor environment & support:
Instructor(s) can set up an online classroom that mirrors the actual classroom experience. Assign work, monitor students’ progress in real-time, manage the paper trail, and provide feedback. Use the instructor comment bank to assist in providing students with relevant guidance. Generate charts that illustrate the distribution of a student’s sources.

Note-taking & outlining:
On the Notecard Tabletop, students create, tag, pile and link notecards in ways specifically designed to make connections, develop original ideas and articulate arguments. Drag notecards into piles to suggest subtopics, then into your outline to organize your ideas in preparation for writing. Take advantage of the ability to archive and annotate online source material for future reference, and as an originality check for both student and teacher.

Source evaluation & citation:
Generate accurate citations in MLA, APA, and Chicago formats. Citation advice is always up-to-date according to the latest handbook additions. Templates are also available for complex legal sources based on The Bluebook. Field-by-field help and dynamic citation forms assist students in identifying and evaluating source information. For Freshman Comp classes, NoodleTools serves as the “training wheels” for complex reference-management software.

Group collaboration:
Any number of students can work on a project simultaneously from different locations and view each other’s changes in real-time. Notecards and citations are clearly labeled with the name of the student who authored them.

Google Drive integration:
Our integration with Google Drive (including support for Google Apps for Education accounts) gives you the option to receive and review student papers online. Students can also choose to export their source list, notecards and outline to Word or other writing space.

NoodleTools Supporters

“NoodleTools is an invaluable tool for integrating information while avoiding plagiarism. Because of the collaborative nature of this application, student researchers are transparent. Teachers and library media specialists can see notecards, bibliographies and outlines, and monitor all stages of the research process.” Teacher Librarian, December 2012, p. 32 by S. Cohen.

“This has been the most helpful product I have used in my three years of college. You are probably responsible for the major part of my 4.0 average this semester.”
University Student

“I have never found a friendlier, more helpful, more responsive website than yours. I’m so happy I could be part of bringing it to my university.”
Department Coordinator
